Subject: FW: DENR Solid Waste Recommendations

As you know, Session Law 2006-244 imposed a 12-month moratorium on the issuance of permits by the Department of Environment and Natural Resources (DENR) for new landfills in the State and directed the Environmental Review Commission (ERC) to study issues related to solid waste. On 31 January 2007 the Cochairs of the ERC requested DENR to provide specific recommendations on solid waste management. In response to this request, DENR has provided four documents as follows:

1. Draft legislation setting out DENR's recommendations
2. An outline of options to address issues related to solid waste franchise authority
3. Draft legislation related to franchise "Option A"
4. A summary of DENR's recommendations

Due to the level of interest in this topic and in response to several requests, I am making this information available to all persons on the ERC distribution list. Please note that these documents are recommendations and drafts. The ERC has yet to take action on this issue. I anticipate that the ERC will meet soon for this and other purposes.

George F. Givens
Commission Counsel
